

R Programming - Intermediate

Course Overview – 1-day course

Efficient use of R

Coming soon!

What do I need to know to attend?

- Attended our Introduction to R programming course or have basic familiarity with R. You will not be expected to code unassisted but will learn more and participate more easily if you have at least a fundamental understanding of R syntax.
- Basic familiarity with Power BI is desirable (data import and creating basic visuals).
- Basic understanding of statistics (mean, median, standard deviation, variance).
